

MATTHEW BEAN

San Diego, CA • bean.packets@gmail.com • github.com/beanpackets • linkedin.com/in/beanpackets

Summary

IT support professional with hands-on experience running help desk operations, administering a cloud-based CRM platform, and troubleshooting hardware, account, application, and connectivity issues for end users. Comfortable with practical hardware work, including PC builds, component-level diagnostics and repair, and peripheral and workstation setup, alongside ticketing, triage, and escalation. Studying for CCNA certification, with completed Microsoft Learn training in Active Directory Domain Services and Azure Virtual Desktop deployment and monitoring; open to pursuing CompTIA A+ as well if the role calls for it. Clear communicator who knows when to resolve directly and when to escalate to Tier 2/3 or engineering. Based in San Diego and available full-time, on-site.

Technical Skills

- **Systems & Infrastructure:** Windows 10/11 desktop administration and troubleshooting; Active Directory fundamentals (Microsoft Learn: Active Directory Domain Services); Azure Virtual Desktop & Windows 365 (Microsoft Learn: deployment and infrastructure monitoring); Linux fundamentals (home server administration); basic virtualization concepts
- **Hardware & Physical Support:** PC building and component upgrades (RAM, storage, GPU); hardware diagnostics and repair, including boot/POST troubleshooting; printer, monitor, and peripheral installation and setup
- **Networking (studying for CCNA):** IP addressing & subnetting, routing & switching fundamentals, VLANs, DNS/DHCP, VPN configuration, basic network security concepts; troubleshooting connectivity, DNS, and access issues
- **Platforms & Tools:** Salesforce CRM (configuration, records management, automation), GitHub Issues & Git version control, Google Workspace, join.me; adaptable to Microsoft Office and Adobe Acrobat workflows
- **Core Competencies:** Help desk & ticketing operations, technical troubleshooting & escalation, SLA management, bug reproduction & documentation, system/status monitoring, client communication

Training & Certifications

- CCNA — in progress
- CompTIA A+ — open to pursuing if required for the role
- Microsoft Learn: Active Directory Domain Services — completed
- Microsoft Learn: Deliver Cloud-Hosted Desktops Using Azure Virtual Desktop and Windows 365 — completed
- Microsoft Learn: Monitor and Maintain an Azure Virtual Desktop Infrastructure — completed

Professional Experience

JoyPunk LLC, Long Beach, CA

October 2025 – Present

HelpDesk Support Technician

- First point of contact for support tickets, emails, chats, and calls covering the company website and SaaS applications
- Triage, log, and prioritize tickets in GitHub Issues, keeping response and resolution times within SLA
- Troubleshoot login, account, permissions, and connectivity issues across web and SaaS platforms, including SSO and password resets
- Walk users through browser, cache/cookie, and network troubleshooting steps to resolve access issues without a full escalation
- Diagnose website issues (broken links, page errors, form failures, slow load times) and support SaaS functionality, configuration, and integration problems
- Reproduce reported bugs and write detailed steps-to-reproduce; escalate anything beyond Tier 1 to Tier 2/3, engineering, or product with clear documentation
- Monitor system status dashboards and proactively communicate known outages or incidents to users
- Maintain internal knowledge base articles, FAQs, and troubleshooting guides; track recurring issues to help spot root causes

Rainbow Financial Group

01/2019 – 10/2025

Technical Support Specialist

- Administered Salesforce CRM platform: configured custom fields, created automated actions, and managed agent data records to support onboarding and ongoing operations
- Managed the full insurance agent licensing and credentialing lifecycle: collecting, validating, and tracking carrier-required documentation from submission through approval
- Identified, diagnosed, and resolved platform issues; escalated complex technical matters to Salesforce support and coordinated resolution with internal stakeholders
- Audited agent records and paperwork on an ongoing basis to ensure compliance with evolving carrier requirements and internal standards
- Facilitated and led internal meetings via join.me to communicate platform updates, procedural changes, and carrier requirements to agents
- Served as primary resource for agents navigating platform functions, licensing processes, and carrier requirements, fielding calls and resolving issues directly

Tops

08/2016 – 01/2019

Full Service Delivery

- Interfaced directly with clients in-home; recommended products tailored to individual needs and specifications
- Managed inventory and order fulfillment using shared Google Sheets and email; coordinated routes to meet 15-minute ETA deadlines
- Handled weekly cash drops and communicated inventory needs with partners and dispatch

Whole Foods Market

07/2015 – 08/2016

Cashier

- Processed cash, credit, debit, and check transactions with accuracy; created end-of-shift cash reports
- Resolved customer issues and returns; verified ID for age-restricted alcohol sales

Home Lab & Hardware Projects

- Built and upgraded multiple PCs, including component installation/replacement and troubleshooting boot/POST failures
- Designed and maintain a home server environment: DNS filtering, VPN configuration, and uptime monitoring
- Installed and configured printers, monitors, and other peripherals across personal and family systems

Education

Browning Academy — La Verkin, UT — High School Diploma — June 2006

Saddleback College — Mission Viejo, CA — Major in Photography — Aug 2006 – Dec 2007
